

# SOB II™

## SECOND GENERATION COLLAPSIBLE DEFENSE SYSTEM

LEVEL  
IV

The SOB II™ is an evolution of the legendary collapsible defense system pioneered by Special Ops Bunker. It is designed for efficient transport and quick deployment. After all, armor is worthless if you can't take it with you.

Our unique patented design allows the SOB II™ to collapse into a single compact unit, small enough to fit in the trunk of a patrol car for transport or storage. When you need the SOB II™ it can be fully deployed in one minute or less. This makes the SOB II™ ideal for a broad range of tactical deployments.

The SOB II™ is available with modular side panels that can be quickly removed to function as hand-carry shields. The side panels swing back, offering added protection on the sides, and also allows the SOB II™ to pass easily through a single-wide doorway. When placed in the forward position, the side panels offer a wider overall ballistic protection area.

The SOB™ armor system is certified to meet or exceed NIJ 0108.01 standards. Wheels, axles, and run-flat tires can also withstand multiple gunshots.
